

# Stolar among advancing tech companies

## SPECIAL TO THE RANGE

Stolar Research Corporation has been selected as an award recipient of the "Flying 40" for 2007, the ninth consecutive year the Raton company has received this award.

The award recognizes leading technology companies in New Mexico. There is a special "Flying 40" section to be published in the Albuquerque Journal's Business Outlook June 28. The Flying 40 is a list of the largest and fastest-growing technology employers in New Mexico. The companies are ranked according to current revenues and percentage growth in revenues. This will be the 10th year of the Flying 40 Awards.

The Albuquerque Journal's Business Outlook, along with Technology Ventures Corporation, KPMG LLP, and New Mexico

## BUSINESS

Bank & Trust, co-sponsors the annual awards program. All of the companies earning the Flying 40 recognition will be honored at a luncheon June 26 at the Embassy Suites Hotel in Albuquerque.

Stolar is an advanced radio geophysics company. The research and development company develops and manufactures unique products to solve problems for the commercial energy industry and the U.S. military. These products use electromagnetic radio waves to penetrate the earth, detecting and imaging underground geologic formations and structures and enabling in-mine wireless tracking and communications.
